WORK EXPERIENCE

Software Engineer

[Mercor](#)

📅 July 2025 – Present

📍 Remote

- Designed and scaled **backend automation systems** using **Redis queues**, **rate limiting**, and **LLM-based message parsing** for safe high-throughput LinkedIn workflows.
- Built **distributed enrichment pipelines** integrating BrightData and multi-provider email/phone waterfalls, delivering **546k+ profile** and **35k+ email enrichments**.
- Implemented **API key rotation**, **credit accounting**, **retries**, and **Slack-based monitoring** to ensure reliability under provider rate limits.
- Developed core recruiter platform primitives including a **Unified Inbox (Unibox)** and **candidate communication side panel**, consolidating multi-channel communication data.
- Owned platform-wide **SEO and content infrastructure** using Next.js, JSON-LD schemas, sitemaps, and Sanity CMS.

Full Stack Software Developer Intern

[Zeal AI](#)

📅 Dec 2024 – May 2025

📍 Remote

- Designed backend services using **Python** and **FastAPI** to aggregate and normalize restaurant data from **7+ booking platforms** with near real-time synchronization.
- Built **large-scale scraping pipelines** with retries, deduplication, proxy rotation, and geo-collision handling to ensure data accuracy across regions.
- Implemented **RAG-based query pipelines** using GPT APIs and vector databases to support price-aware and cuisine-specific search.

Software Development Engineer Intern

[Dover Corporation](#)

📅 May 2024 – July 2024

📍 Bengaluru, India

- Built and deployed **backend services with Node.js on AWS EC2**, automating distributor onboarding workflows and eliminating manual database updates.
- Designed **CI/CD pipelines using GitHub Actions** and implemented **rate limiting**, **bot mitigation**, and **DDoS protection** for production stability.

TECHNICAL SKILLS

- Backend & Systems:** Node.js, Python, FastAPI, REST APIs, Webhooks, Redis, Queues, Background Workers, Rate Limiting, Idempotency
- Databases:** PostgreSQL, MySQL, MongoDB, Prisma ORM, Indexing, Query Optimization, Vector DBs (Pinecone, Chroma)
- Cloud & DevOps:** AWS (EC2, S3, IAM), Docker, GitHub Actions (CI/CD), Secrets Management
- AI Engineering:** RAG Pipelines, LangChain, LangGraph, OpenAI / Gemini APIs, Embeddings
- Frontend & Product:** React.js, Next.js, TypeScript, Tailwind CSS, SEO (next-seo), Chrome Extensions

EDUCATION

B.E. Computer Science (CGPA: 7.64)

BITS Pilani

📅 2021 – 2025

📍 Pilani, Rajasthan

Class XII (CBSE) – 96.2%

Jawahar Vidya Mandir, Shyamali

📅 2021

📍 Ranchi, Jharkhand

Class X (CBSE) – 95.8%

Jawahar Vidya Mandir, Shyamali

📅 2019

📍 Ranchi, Jharkhand

ACHIEVEMENTS

- Winner** — Quark Hackathon 2024, BITS Pilani
- Google Cloud Digital Leader** — Certified with 90% score

PROJECTS

ShadBolt AI — AI Website Generator

- Built an AI-driven platform (inspired by **Bolt.new**) that converts **natural language prompts** into production-ready **React applications** using **Google Gemini**, supporting iterative prompt-to-code refinement.
- Designed a **real-time code execution pipeline** with **Sandpack**, enabling live preview, instant rendering, and synchronized code editing in an embedded browser environment.
- Implemented a scalable **full-stack architecture** using **Next.js 15** and **Convex**, with **Google OAuth**, token-based pricing, and persistent workspaces.

Phodu.Club — Test Preparation Platform

- Built a production-grade SaaS platform using **Next.js 15**, **TypeScript**, and **PostgreSQL/Drizzle ORM**, deployed on **AWS** with **SST (Serverless Stack)** featuring **CloudFront** CDN, **Lambda**, **RDS**, and **S3**.
- Implemented secure authentication using **Better Auth** (Google OAuth, email/password), payment processing with **Juspay**, and DRM-protected video streaming via **VdoCipher** with dynamic watermarking to prevent piracy.
- Architected a comprehensive admin platform with **granular RBAC system** (5 roles, 80+ permissions), question bank with 1000+ questions, test series management with drag-and-drop, bulk operations, analytics dashboard, and integrated **CometChat SDK** for real-time community features with 3-tier access control.
